IMPLEMENTATION MANAGER

Description:

This position will be responsible for implementation services to pharmacy supply chain clients. Primary responsibilities include working with hospital C-Suite, hospital pharmacy directors, contracted pharmacies and PBMs to implement programs such as 340b and GPO pricing programs to maximize pharmacy value for hospital employees and patients.

Specific Duties Include:

- Lead large scale implementations in conjunction with assigned account team including all aspects of project plan implementation and development
- Provide input into implementation plans, Scope of Work documents and task lists
- Continually improve processes for implementations and ensure implementation forms and processes are kept up to date
- Develop and execution of project plans
- Develop/expand test plans for claim adjudication to ensure accuracy
- Lead on-site implementation kick-off meetings at the client site
- Support implementation-related requests for proposal (RFP) process

Desired Skills:

- Knowledge of the PBM industry or retail pharmacy operations **required**
- Preferred background of 3 years PBM implementation experience
- 340b or GPO program implementation experience is a plus
- College degree (preferred but not required)
- Project Management Certification a plus
- Proficient in Microsoft Office including high level of proficiency in Microsoft Project
- Organized, detail-oriented
- Solid, independent worker
- Creativity and flexibility are a must. PSG is a dynamic environment and requires a candidate that is comfortable facing new challenges
- Some travel required

Salary and Benefits:

Salary is negotiable based on background and experience. Benefits include full medical, pharmacy, dental, vision, life and disability insurance, paid vacation, sick leave, 401k match and annual bonus potential.
